

## DRIVE RITE: KEYS TO SMART DRIVING

### Lesson Two Homework

In Lesson Two you learned about driving distractions, strategies for dealing with driving distractions, and defensive driving practices. You also learned some strategies to help you make informed decisions and ways to use these strategies to think ahead or react in emergency situations that require an immediate response. Practice these two decision-making strategies at least once in the next week and record the information below. Don't forget to record the lessons learned through the exercise.

1) What is the event that occurred or that you thought might occur? Describe below.

2) What strategy did you use to help you make a decision (weighing benefits and consequences or asking four questions)? Why did you choose this strategy?

3) What decision did you make, and what did you learn through the process?
